

ÖGV Seminar 2022

11 July 2022
Montanuniversität Leoben

Scope

The Austrian Vacuum Society (ÖGV) invites all PhD students from Austrian universities working in the field of vacuum technology and thin film development to participate in the ÖGV-Seminar to share their work. Other interested persons from academia or industry are invited to discuss recent findings and developments. With this event we aim to bring together the different groups in Austria active in the field to stimulate the exchange of knowledge and to trigger potential collaborations.

PhD students are invited to submit abstracts for contributions to be presented as a lecture in a focused topic format or as a poster. To allow for evaluation by the Scientific Committee, the abstracts (max. 175 words) should clearly outline the aim of the work and the methods employed, as well as the major results and conclusions.

Plenary lecture

Interface design and engineering by atomic layer deposition for next-generation energy devices

Prof. Dr. Adriana Creatore

Eindhoven University of Technology, Plasma and Materials Processing Group

Facts
