

# ÖGV-Seminar 2023

**Submission  
Deadline  
23 May 2023**

## SCOPE

The Austrian Vacuum Society (ÖGV) invites all PhD students from Austrian universities working in the field of vacuum technology and thin film development to participate in the 3<sup>rd</sup> ÖGV-Seminar to share their work. Furthermore, all other interested persons from academia and industry are of course welcome to discuss recent findings and developments. With this one-day event we aim to bring together different groups in Austria active in the field of vacuum technology to stimulate the exchange of knowledge and to trigger potential collaborations.

PhD students are invited to submit abstracts for contributions to be presented as a lecture in a focused topic format or as a poster. To allow for evaluation by the Scientific Committee, the abstracts (max. 175 words) should clearly outline the aim of the work and the methods employed, as well as the major results and conclusions.

**PLENARY LECTURE:**    **Nanoparticles: size isn't everything, Dr. Alex Shard**  
**Head of Chemical Sciences for the Chemical, Medical and Environmental Science Department at the National Physical Laboratory, London (UK)**

## FACTS

- › **Date & Place:**    13 June 2023, TU Wien
- › TU Wien, Festsaal, Building AA (1. OG), Karlsplatz 13
